Eliminate render-blocking JavaScript and CSS in above-the-fold content

You have no render-blocking resources. Learn more about [removing render-blocking resources](#).

Optimize images

Your images are optimized. Learn more about [optimizing images](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

74 / 100 User Experience

Mobile

⬛ Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Additionally,...e the request. and 1 others render only 6 pixels tall (16 CSS pixels) final.

✅ 3 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Mobile

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about sizing tap targets appropriately.

⚠ Consider Fixing:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

Avoid landing page redirects for the following chain of redirected URLs.

- http://buescher.org/

- http://www.buescher.org/

- http://www.marco-buescher.name/

Desktop

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Minify HTML for the following resources to reduce their size by 382B (22% reduction).

- Minifying http://www.marco-buescher.name/ could save 382B (22% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

Minify JavaScript for the following resources to reduce their size by 180B (39% reduction).

- Minifying http://www.marco-buescher.name/scripts/slpd.js could save 180B (39% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

- http://www.marco-buescher.name/scripts/snippet-javascript-console.min.js?v=1

- http://www.marco-buescher.name/scripts/slpd.js

Desktop

[Optimize CSS Delivery](#) of the following:

- http://www.marco-buescher.name/style.css

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 3.8KiB (72% reduction).

- Compressing and resizing http://www.marco-buescher.name/img/uparrow_arriba.png could save 3.1KiB (95% reduction).

- Compressing and resizing http://www.marco-buescher.name/img/print.png could save 524B (70% reduction).

- Compressing http://www.marco-buescher.name/img/button.png could save 120B (14% reduction).

- Compressing http://www.marco-buescher.name/img/bg.png could save 101B (24% reduction).
