

# PageSpeed Insights

## Mobile

54 / 100 Speed

Should Fix:

### Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://empfohlen.de/>
- <http://www.empfohlen.de/>
- <https://www.empfohlen.de/>

### Leverage browser caching

## Mobile

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- [https://www.empfohlen.de/themes/default/img/checkbox\\_checked.svg](https://www.empfohlen.de/themes/default/img/checkbox_checked.svg) (expiration not specified)
- [https://www.empfohlen.de/themes/default/img/checkbox\\_unchecked.svg](https://www.empfohlen.de/themes/default/img/checkbox_unchecked.svg) (expiration not specified)
- [https://www.empfohlen.de/themes/default/img/logo\\_empfohlen.de.svg](https://www.empfohlen.de/themes/default/img/logo_empfohlen.de.svg) (expiration not specified)

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 6 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://www.empfohlen.de/themes/default/js/jquery-3.1.1.min.js>
- <https://www.empfohlen.de/themes/default/js/jquery-ui-1.12.1.min.js>
- <https://www.empfohlen.de/themes/default/js/jquery.mCustomScrollbar-3.1.5.min.js>
- <https://www.empfohlen.de/themes/default/js/stage.js>
- <https://www.empfohlen.de/themes/default/js/page.js?v=1.40>

## Mobile

- <https://www.empfohlen.de/themes/default/js/jquery.selectric-1.11.1.min.js>

[Optimize CSS Delivery](#) of the following:

- <https://fonts.googleapis.com/css?family=Open+Sans:400,600,700&subset=latin-ext>
- <https://www.empfohlen.de/themes/default/css/style.css?v=1.40>

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 369B (43% reduction).

- Compressing [https://www.youtube.com/iframe\\_api](https://www.youtube.com/iframe_api) could save 369B (43% reduction).

#### Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 981B (15% reduction).

- Minifying <https://www.empfohlen.de/> could save 981B (15% reduction) after compression.

#### Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and

## Mobile

execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 3.3KiB (33% reduction).

- Minifying <https://www.empfohlen.de/themes/default/js/stage.js> could save 2.9KiB (36% reduction) after compression.
- Minifying <https://www.empfohlen.de/themes/default/js/page.js?v=1.40> could save 389B (19% reduction) after compression.

## Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 20KiB (28% reduction).

- Compressing [https://www.empfohlen.de/stage/default/background\\_2\\_mobile.jpg](https://www.empfohlen.de/stage/default/background_2_mobile.jpg) could save 20KiB (28% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 12% of the final above-the-fold content could be rendered with the full HTML response.
- Click to see the screenshot with only the HTML response: [snapshot:10](#)
