! Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 8 blocking script resources and 12 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://gft-online.de/wp-content/plugins/google-analytics-for-wordpress/assets/js/frontend.min.js?ver=6.2.7>
- <http://gft-online.de/wp-includes/js/jquery/jquery.js?ver=1.12.4>
- <http://gft-online.de/wp-includes/js/jquery/jquery-migrate.min.js?ver=1.4.1>

- <https://s3.mylivechat.com/livechat2/chatinline.css>

Consider Fixing:

Leverage browser caching

Mobile

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://gft-online.de/wp-content/themes/total/assets/images/check.png> (expiration not specified)
- <http://www.google-analytics.com/analytics.js> (2 hours)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 469B (15% reduction).

- Minifying <http://gft-online.de/wp-content/plugins/ultimate-faqs/css/ewd-ufaq-styles.css?ver=4.9.2> could save 345B (17% reduction) after compression.
- Minifying <https://s3.mylivechat.com/livechat2/chatinline.css> could save 124B (12% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 294B (15% reduction).

- Minifying <https://s3.mylivechat.com/livechat2/livechat2.aspx?hccid=92011001&apimode=chatinline> could save 294B (15% reduction) after compression.

Mobile

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 7.7KiB (33% reduction).

- Compressing <http://gft-communicate.de/wp-content/uploads/2017/01/gft-logo-web.png> could save 7.7KiB (33% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 58% of the final above-the-fold content could be rendered with the full HTML response snapshot:19.

3 Passed Rules

Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Enable compression

You have compression enabled. Learn more about [enabling compression](#).

Mobile

Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

100 / 100 User Experience

 5 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
